Kingdom Connect – Product Requirements Document (PRD)

Oct 14, 2026 · @Champion

1. Document info and purpose

This PRD turns the Kingdom Connect Project Plan v1.1 into buildable requirements: what each screen does, who can use it, and how we know it works.

Item	Detail
Product	Kingdom Connect (People • Opportunities • Growth)
PRD version	0.1 (draft)
Source	Project Plan v1.1, 14 October 2026 (FR-01 to FR-49, UC-01 to UC-43)
Audience	Development team, UI/UX designer, Technical Committee, project lead
Status	Draft for review

How to read it. Each feature section has user stories ("As a … I want … so that …") and acceptance criteria (AC). Each story cites the plan's FR or UC numbers so the two documents stay traceable. Where this PRD makes a product decision the plan does not make, it is marked **Proposed** and listed in Open questions.

2. Product overview and goals

Kingdom Connect is a verified, members-only platform where the Mkuyuni Community finds people, opportunities and ideas to grow together, on web and mobile.

Problem. Members meet at church but have no way to find each other's skills, businesses, ideas or opportunities during the week. Opportunities get missed, and unverified channels expose members to job and investment scams.

Product goals

1. Every member can find verified professionals and businesses by skill, sector and location.
2. Members can find and apply for safe, verified opportunities, with scam posts removed fast.
3. Innovators can share ideas and meet investors or partners without losing control of their IP.
4. Investors can find ideas discreetly, without being publicly listed or pitched.
5. Members can grow through training, events, tenders and community news.

Non-goals (Phase 1)

- Moving money: no payments, course fees, escrow or investment transactions.
- Mentorship matching.
- Members resident outside Tanzania.
- Public, non-member access to any content beyond the landing and sign-up pages.

3. Users, roles and permissions

Roles stack: a member gains rights by passing further verification, and the investor flag is a private permission added on top of a member account.

Role	How someone gets it	Visible to other members as
Applicant	Submits registration	Not visible
Verified Member (Level 1)	NIDA + manual review approved	Member, with profession
Verified Business (Level 2)	BRELA, TRA TIN, business licence approved	Member + business listing
Opportunity Poster (Level 3)	Director/authorisation proof + physical address approved	Member + business listing
Investor (private flag)	Invitation by an Administrator or Super Administrator, or approved application from a Level 2 member	Same as their base role; never labelled investor
Administrator	Assigned by Super Administrator	Staff badge
Super Administrator	Assigned at setup	Staff badge

Permission matrix (✓ = allowed, — = not allowed)

Action	Member L1	Business L2	Poster L3	Investor flag	Admin
Browse directories, profiles, opportunities, ideas	✓	✓	✓	✓	✓
Connect and message	✓	✓	✓	✓	—
Apply for opportunities, register for training and events	✓	✓	✓	✓	—
Submit ideas, express named interest	✓	✓	✓	✓	—
List a business in the directory	—	✓	✓	—	—
Post opportunities and tenders	—	—	✓	—	—
Post training and courses	✓ (admin approval)	✓	✓	—	✓
Apply for investor flag	—	✓	✓	—	—
Anonymous interest, silent browsing, investor filters, saved list	—	—	—	✓	—
Approve members, businesses, investors; moderate; take down	—	—	—	—	✓

Action	Member L1	Business L2	Poster L3	Investor flag	Admin
See investor list and audit logs	—	—	—	—	✓
Manage admin accounts and settings	—	—	—	—	Super Admin only

A professional who is also a student is one Level 1 member with study information on their profile (FR-09).

4. Scope and release plan

Phase 1 ships in two releases inside the 12-month plan: Release 1 builds trust and connection, and Release 2 adds everything that depends on that trust.

Area	Release 1 (Core, months 5–7)	Release 2 (Extended, months 7–9)
Accounts	Registration, NIDA verification, MFA login, approval workflow	Annual business re-verification
Dashboards	Member and Admin dashboards (core widgets)	Widgets for opportunities, ideas, featured items, news
Profiles and directories	Professional and business profiles, study info, search, privacy masking	Business levels 2 and 3
Connections	Requests, accept/decline, secure messaging	—
Safety	Report a scam/bad user, admin review, suspension	Fast takedown of opportunities, probation queue
Opportunities	—	Posting, applications, featured, Scan for Opportunities, tenders
Ideas and investors	—	Ideas pool, profile Ideas tab, NDA flow, investor flag and tools
Learning and community	—	Training and courses, events, news

Area	Release 1 (Core, months 5–7)	Release 2 (Extended, months 7–9)
Agreements	—	Agreement form, e-signing, legal support (see Open questions)

Platforms: responsive web portal plus Android and iOS apps with the same features.

Geography: Tanzania only. Registration requires a valid NIDA number.

Out of scope: payments of any kind, investment transaction processing, e-commerce, social media integrations, mentorship, members outside Tanzania.

5. Information architecture and navigation

Members and administrators get different sidebars; a member never sees admin items, and an investor's sidebar looks the same as any member's.

Member sidebar: Dashboard · Professionals · Businesses · Opportunities (Jobs, Partnerships, Investment, Tenders) · Ideas · Training & Courses · Events · Messages · Connections · Reports & Safety · Settings. Persistent "Report a Scam / Bad User" card at the foot.

Investor additions (inside Ideas only): investor filters, Saved ideas, anonymous "Express interest" option. No separate menu item.

Admin sidebar: Admin Dashboard · Verification Queue (members, businesses, investors) · Moderation Queue (opportunities, ideas, training, events, tenders) · Reports · Re-verification · Members · Investors · News · Featured · Audit Log · Settings.

Key screens

#	Screen	Used by
1	Landing, sign-up, login, OTP	Everyone
2	Registration wizard (personal, category, category details, credentials, review)	Applicant
3	Registration status	Applicant
4	Member dashboard	Members
5	Directory list + filters (Professionals, Businesses)	Members

#	Screen	Used by
6	Member profile (About, Skills, Business, Ideas tab)	Members
7	Connections and requests	Members
8	Messages (inbox, thread)	Connected members
9	Opportunities list, detail, apply, post form	Members, posters
10	Ideas pool, idea summary, idea detail, submit form, access manager	Members, owners, investors
11	Training list, detail, post form, learning materials	Members
12	Events list, detail, registration	Members
13	Business verification and upgrade (Level 2, Level 3, investor application)	Members
14	Report form, my reports	Members
15	Admin dashboard and each queue	Admins
16	Settings (profile privacy, notifications, password, MFA)	All

6. Registration, login and verification

No one reaches member content until an administrator has verified their NIDA identity, and business rights unlock one level at a time.

Stories

- **REG-1** As a church member in Tanzania, I want to register on web or mobile so that I can join the platform. (FR-01, UC-01–06)
- **REG-2** As an applicant, I want to see my registration status so that I know when I can log in. (FR-04, FR-05)
- **REG-3** As an admin, I want to review pending profiles and approve or reject them so that only real members get in. (FR-03, UC-07–08)
- **REG-4** As a member, I want to log in with password and OTP so that my account is protected. (FR-02, UC-09–10)

- **REG-5** As a business owner, I want to upgrade to Verified Business, then Opportunity Poster, so that I can list my business and post opportunities. (FR-32, UC-28–29)

Acceptance criteria

1. The wizard collects full name, username, address, NIDA number, email, phone, occupation category (Professional, Businessperson, Entrepreneur, Other) and optional study info.
2. Category-specific fields appear based on the category (for example, CPA number for auditors; CISSP, CISM, CEH for cybersecurity).
3. NIDA number must be 20 digits and unique across accounts; a duplicate blocks submission and alerts admins (duplicate-profile detection). In Phase 1 an admin checks NIDA details manually; integration with NIDA's verification service may follow if problems arise.
4. On submit, status = Pending and the applicant receives an email and SMS confirmation.
5. Admin sees each pending applicant with documents side by side and must give a reason when rejecting; the reason is sent to the applicant.
6. Status values: Pending → Approved or Rejected. A rejected applicant can correct and resubmit once (Proposed).
7. Login requires username/password, then a 6-digit OTP sent by email during the pilot (SMS OTP considered later, depending on cost), valid 5 minutes, 3 attempts (Proposed values).
8. Five failed password attempts lock the account for 15 minutes (Proposed).

Business verification levels

Level	Unlocks	Documents the member uploads	Admin checks
2. Verified Business	Business directory listing; may apply for investor flag	BRELA certificate, TRA TIN certificate, valid business licence	Documents match the business name; licence not expired
3. Opportunity Poster	Post opportunities and tenders	Proof of directorship (BRELA records) or authorisation letter; physical address	Person is director or authorised; address confirmed

9. A member can only request Level 3 after Level 2 is approved.

10. Each level shows its own status (Not started, Pending, Approved, Rejected, Expired) on the member's verification screen.
11. Licence expiry date is captured at Level 2 approval and drives annual re-verification (section 13).

7. Dashboards

The member dashboard shows community activity and the member's own to-dos; every approval, rejection and moderation figure lives only on the admin dashboard. (FR-30, FR-31)

Widget	Member dashboard	Admin dashboard
Welcome, date, location	✓	✓
Community stats: verified members, registered businesses, open opportunities, ideas in pool	✓	✓
My connection requests (accept/decline inline)	✓	—
My activity: applications, idea requests, registrations	✓	—
Featured opportunities	✓	—
Latest opportunities & more (tabs: All, Jobs, Training, Tenders, Investments, Ideas)	✓	—
Quick actions: Post opportunity (Level 3 only), Share an idea, Scan for opportunities, Post training	✓	—
Latest news & updates	✓	✓
Pending verifications (members, Level 2, Level 3, investors)	—	✓
Rejected/denied members	—	✓
Open reports and items hidden pending review	—	✓
Moderation queue counts (opportunities, ideas, training, events, tenders)	—	✓

Widget	Member dashboard	Admin dashboard
Re-verifications due in 30 days	—	✓
Investor count and activity	—	✓

Acceptance criteria

1. The member dashboard API never returns pending, rejected or investor counts, so they cannot appear even through a client bug.
2. Quick actions a member is not entitled to are hidden, with a short path to upgrade (for example, "Verify your business to post opportunities").
3. Each admin count links straight to its filtered queue.
4. Stats refresh at least every 15 minutes (Proposed).

8. Profiles and directories

Profiles show what people do and offer, never how to reach them; contact happens only through a connection. (FR-06–12, FR-25, UC-11–13)

Stories

- **PRO-1** As a member, I want to build a profile with my profession, skills and experience so that others can find me.
- **PRO-2** As a member who is studying, I want to add my institution, course and year so that I can be found as a student without a separate account.
- **PRO-3** As a member, I want to search and filter Professionals and Businesses so that I can find the right person or company.
- **PRO-4** As a member, I want to see someone's ideas on their profile so that I know what they are working on.

Profile fields

Section	Fields	Shown to members
Basics	Photo, name, headline, city/region, bio	✓

Section	Fields	Shown to members
Professional	Profession, skills (tags), experience, certifications, credentials	✓
Study (optional)	Institution, course, year	✓
Business (Level 2+)	Business name, sector, size, description, logo, verified badge	✓
Ideas tab	Published idea summaries	✓ (per idea settings)
Contact	Phone, email, physical address	— (masked; member may choose to share with connections)
Identity	NIDA number, documents	— (admins only)
Investor flag	—	— (admins only)

Acceptance criteria

1. Directory cards show photo, name, headline, location, top 3 skills, verified badge and a Connect button; no contact details.
2. Filters: profession, skills, sector, region/city, currently studying (yes/no), verification level for businesses.
3. Search matches name, profession, skills and business name, and returns results in under 2 seconds for 10,000 members.
4. Location is chosen from Tanzanian regions and districts only.
5. Contact fields are never sent to another member's device; they are revealed only inside an accepted connection, and only if the owner chooses to share them. Sharing is optional and set by each member in privacy settings.
6. A member can hide their profile from the directory without leaving the platform (Proposed).

9. Connections and messaging

Two members can message only after one accepts the other's connection request. (FR-13–14, UC-14–16)

Stories

- **CON-1** As a member, I want to send a connection request with a short note so that the other person knows why I'm reaching out.
- **CON-2** As a member, I want to accept or decline requests so that I control who can message me.
- **CON-3** As a connected member, I want to message securely so that I don't need to share my phone number.

Acceptance criteria

1. Request states: Sent → Accepted, Declined or Withdrawn. Declining does not notify the sender (Proposed: the request simply stays pending for them for 30 days, then expires).
2. The request note is optional, up to 300 characters.
3. A member can send at most 30 requests a day to slow spam (Proposed).
4. Messages support text and attachments (PDF, images, up to 10 MB). Messages are encrypted in transit and at rest.
5. Either side can remove a connection or block a member; blocking stops messages and hides each from the other's searches.
6. Every message thread has a "Report" action that sends the thread to admins (section 13).
7. Idea-related conversations (section 11) open as message threads too, labelled with the idea title.

10. Opportunity marketplace

Only Level 3 businesses post opportunities; every post carries a no-fee declaration, and new posters go through admin review first. (FR-15, FR-33–39, UC-30–31, UC-42–43)

Stories

- **OPP-1** As an Opportunity Poster, I want to post a job, partnership, collaboration or investment opportunity so that I can reach verified members.
- **OPP-2** As a member, I want to browse, filter and apply through the platform so that my details stay private until I choose to apply.
- **OPP-3** As a poster, I want to see and respond to applications in one place.
- **OPP-4** As a member, I want to "Scan for Opportunities" so that I see ones that match my skills and location.
- **OPP-5** As an admin, I want to feature selected opportunities on the dashboard.

Posting form — required fields

Field	Rule
Type	Job, Training/Internship, Partnership, Collaboration, Investment
Title and role	Required
Employment type	Full-time, Part-time, Contract, Internship (jobs only)
Location	Tanzanian region/district, or Remote
Description and requirements	Required, minimum 100 characters
Contact channel	Always via the platform; phone numbers, emails and links in the description are blocked or flagged (Proposed)
Closing date	Required, maximum 90 days ahead
No-fee declaration	Required tick: "No fee will be charged to applicants at any stage"

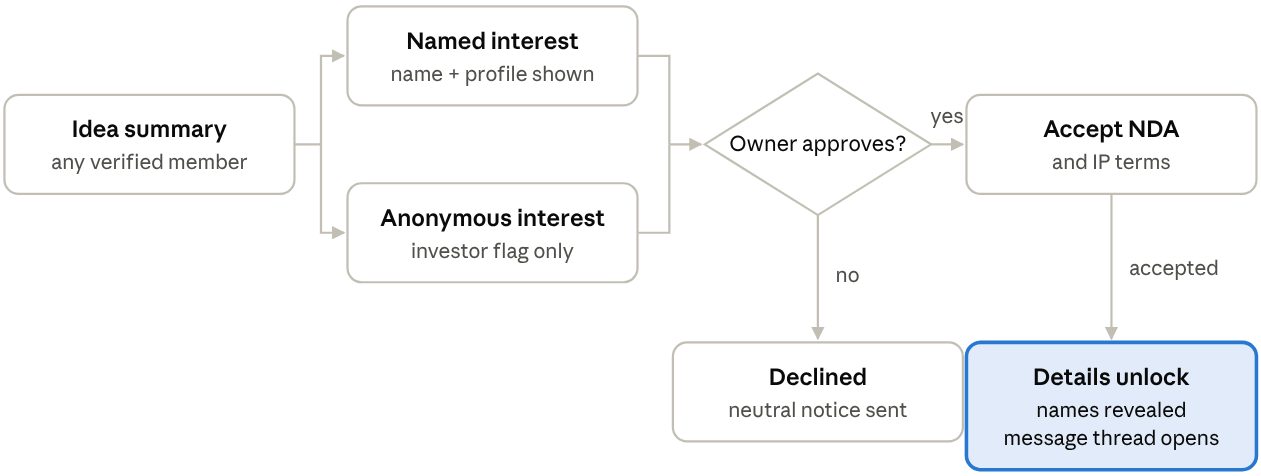

Acceptance criteria

1. A new poster's first 3 opportunities go to the moderation queue (status Pending review); after 3 approvals with no upheld reports, later posts publish directly.
2. Opportunity states: Draft → Pending review → Published → Closed or Expired; also Hidden (reported) and Removed (admin).
3. Apply sends the member's profile and an optional CV (PDF, max 5 MB) and cover note. The poster sees applications as New, Shortlisted, Declined; the applicant sees the same status.
4. A member can apply to an opportunity once.
5. Featured opportunities: an admin picks up to 5 published posts; they show with a Featured badge until the admin removes them or the post closes.
6. Scan for Opportunities ranks open posts by matching skills, profession, location and study info. Phase 1 uses rules, not AI.
7. Filters: type, location, sector, employment type, posted date.

11. Ideas pool and investor access

Every verified member sees idea summaries; full details unlock only when the owner approves and the requester accepts the NDA, and investors stay anonymous until that moment. (FR-16–24, FR-40–44, UC-17–23, UC-35–36)

Idea details unlock only after owner approval and NDA acceptance

idea access flow · named and anonymous routes

Both routes meet at the owner's decision; an anonymous investor's name is revealed only once the NDA is accepted.

Stories

- **IDEA-1** As a member, I want to submit an idea with a summary and choose its visibility so that I can find investors or partners.
- **IDEA-2** As a member, I want to browse ideas in the Ideas section and on profiles so that I can find ones to back or join.
- **IDEA-3** As any member, including a business owner, I want to say "I'm interested" as investor, partner or both so that I can invest without needing the investor flag.
- **IDEA-4** As a flagged investor, I want to filter, save and express interest anonymously so that I am not publicly pitched.
- **IDEA-5** As an idea owner, I want to approve, decline and revoke access so that I control who sees my details.
- **IDEA-6** As a Verified Business, I want to apply for the investor flag.

Idea fields

Layer	Fields
Summary (all members)	Title, problem being solved, industry, stage (Idea, Prototype, Early revenue, Growing), seeking (Investor, Partner, Both), optional investment range in TZS, owner name and profile link unless hidden, interest count
Details (approved only)	Full description, business model, market, financials, team, attachments (PDF, images; max 20 MB total)

Acceptance criteria

1. Idea states: Draft → Pending moderation → Published (named or without name) → Archived; also Hidden (reported) and Removed.
2. A published idea appears in the pool and on the owner's profile Ideas tab. An idea posted without name appears in the pool only, as "A verified member".
3. Named interest shows the requester's name, profile and chosen role (Investor, Partner, Both) to the owner.
4. Anonymous interest (investor flag only) shows the owner: "A verified investor", sector focus and ticket size band: under TZS 10M, TZS 10–50M, or over TZS 50M. Name and profile stay hidden.
5. The owner approves or declines within the request card; declining sends a neutral notice.
6. After approval, the requester must accept the NDA and IP terms before details open. Acceptance timestamp, IP and version of the terms are stored.
7. On NDA acceptance, both identities are shown to each other and a message thread opens, labelled with the idea title.
8. Detail pages and documents are watermarked with the viewer's name and date. Every view and download is logged.
9. The owner's access manager lists everyone with access and a Revoke button; revoking removes access at once and logs it.
10. Investor silent browsing: the owner sees "Viewed by N investors", never names.
11. Investor filters: sector, stage, investment range, region; a private Saved list.
12. The investor flag is granted only by Administrator or Super Administrator invitation or by approving a Level 2 member's application. There is no investor directory, badge or member-facing count.

13. Agreement form, e-signing and legal support (UC-24–27) follow an approved connection; see Open questions on whether these stay in Phase 1.

12. Training, events, tenders and news

These four modules are free to join in Phase 1, and anything members post passes moderation before it goes live. (FR-45–48, UC-37–41)

Module	Who posts	What members do	Key rules
Training & Courses	Any verified member, and admins; every post needs admin approval	Browse, register, open learning materials (PDF, video links, slides)	Title, provider, format (in person, online), date or self-paced, seats; free only; materials visible after registration
Events	Admins and Level 2+ businesses	Browse, register, add to calendar, get reminders	Title, date, time, venue or link, capacity; reminders 1 day and 1 hour before
Tenders	Opportunity Posters (Level 3)	Browse, express interest through the platform	Title, issuing business, scope, closing date, eligibility; same no-fee rule and probation as opportunities
News & Updates	Admins only	Read on the dashboard and News page	Title, image, body, publish date; optional pin to top

Acceptance criteria

1. Training, events and tenders follow the same states as opportunities: Draft → Pending review → Published → Closed; plus Hidden and Removed.
2. Registration stops at capacity and offers a waitlist (Proposed).
3. A registered member sees their trainings and events under "My activity" on the dashboard.
4. The poster sees a registrant list (names and profiles only, no contact details).

5. Learning materials open inside the platform; downloads are allowed only if the poster enables them.

13. Reports, safety and administration

A reported opportunity disappears from members' view the moment it is reported; admins then restore it or act on it, and every admin action is logged. (FR-26–29, FR-35–36, FR-49, UC-32–34)

Stories

- **SAFE-1** As a member, I want to report a scam or bad user from any profile, opportunity, idea or message thread.
- **SAFE-2** As an admin, I want one queue of reports, pending posts and re-verifications so that nothing is missed.
- **SAFE-3** As an admin, I want to suspend repeat offenders.
- **SAFE-4** As a Super Admin, I want an audit log of every admin and sensitive action.

Acceptance criteria

1. The report form asks for a reason (Asked for money, Fake job or business, Harassment, Impersonation, Spam, Other) and an optional note and screenshot.
2. Reporting an opportunity or tender sets it to Hidden immediately. Profiles and ideas stay visible until an admin reviews them.
3. The reporter gets a reference number and the final outcome (Action taken / No action), not the details.
4. Admin actions: Restore, Edit request to poster, Remove, Warn, Suspend posting rights, Suspend account. Each requires a note.
5. Two upheld reports against a business within 12 months suspend its posting rights; three suspend the account pending review.
6. Re-verification: 30 and 7 days before a business licence expires, the member is reminded. On expiry, Level 2 and 3 rights pause until new documents are approved.
7. Audit log records who, what, when, and before/after values for approvals, rejections, moderation, role changes, investor flag changes, and every view of idea details. Logs are read-only and kept at least 5 years (Proposed).
8. Admins cannot see message contents unless a thread has been reported.

14. Notifications

Every event below shows in the in-app bell; during the pilot, OTPs and account messages go by email, and SMS is added later if the budget allows, and members can turn off email for non-critical ones. (FR-05)

Event	Who is told	In-app	Email	SMS
Registration received, approved or rejected	Applicant	✓	✓	Later
Login OTP	Member	—	✓	Later
Business level approved, rejected or expiring	Business member	✓	✓	Later
Connection request received or accepted	Member	✓	✓	—
New message	Member	✓	Digest	—
Application received / status changed	Poster / applicant	✓	✓	—
Post approved, rejected, hidden or removed	Poster	✓	✓	—
Interest in my idea (named or anonymous)	Idea owner	✓	✓	—
Access approved, NDA accepted, access revoked	Owner and requester	✓	✓	—
Matches from Scan for Opportunities	Member	✓	Weekly digest	—
Training or event reminder	Registrant	✓	✓	—
Report outcome	Reporter	✓	—	—
Investor flag granted	Investor	✓	✓	—

Notification text never names an anonymous investor and never includes contact details.

15. Non-functional requirements

The figures below are proposed starting targets for the Technical Committee to confirm.

Area	Requirement
Security	MFA on every login; passwords hashed (bcrypt/Argon2), minimum 8 characters with a number; TLS 1.2+ in transit; AES-256 at rest for documents and messages; role-based access enforced on the server, not just hidden in the UI
Privacy and law	Comply with Tanzania's Personal Data Protection Act 2022: consent captured at registration, members can download or delete their data, hosted with a cloud provider in a region that meets the Act's rules on storing personal data
Document storage	Identity and business documents in a separate encrypted store, visible to admins only, never in public URLs
Performance	Pages and searches load in under 2 seconds on 3G for 95% of requests; app usable on Android 9+ and iOS 15+
Scale	Built for 2,000 members in year 1 and 20,000 without redesign
Availability	99.5% monthly uptime; daily backups kept 30 days; restore tested quarterly
Languages	English and Kiswahili for all member-facing screens
Accessibility	WCAG 2.1 AA contrast and text sizes; works with screen readers on mobile
Data usage	Images compressed; a low-data mode that hides images on mobile
Monitoring	Security logging, alerts on repeated failed logins, unusual message volume, or duplicate NIDA attempts

16. Key data entities and statuses

These are the main records the system stores and the states each can be in, for developers to design the database against.

Entity	Key fields	Statuses
Member	Name, username, NIDA (encrypted), phone, email, region, category, verification level, investor flag (private)	Pending, Approved, Rejected, Suspended, Deactivated
Profile	Headline, bio, skills, experience, certifications, study info, privacy settings	—
Business	Name, sector, BRELA no., TIN, licence no. and expiry, address, level	Pending, Approved, Rejected, Expired
Verification request	Member, level requested, documents, reviewer, reason	Pending, Approved, Rejected
Connection	Requester, receiver, note	Sent, Accepted, Declined, Withdrawn, Expired
Message thread / message	Members, idea link (optional), body, attachments	Active, Reported, Closed
Opportunity	Poster, type, title, location, closing date, no-fee flag, featured flag	Draft, Pending review, Published, Closed, Expired, Hidden, Removed
Application	Opportunity, applicant, CV, note	New, Shortlisted, Declined, Withdrawn
Idea	Owner, summary fields, details, attachments, visibility	Draft, Pending moderation, Published, Archived, Hidden, Removed
Idea access request	Idea, requester, role, anonymous flag, NDA version, accepted at	Pending, Approved, Declined, NDA accepted, Revoked
Training / Event / Tender	Poster, title, dates, capacity, materials	Draft, Pending review, Published, Closed, Hidden, Removed

Entity	Key fields	Statuses
Registration	Member, training or event	Registered, Waitlisted, Cancelled, Attended
News item	Title, body, image, pinned	Draft, Published
Report	Reporter, target, reason, note	Open, Under review, Action taken, No action
Audit log entry	Actor, action, target, before/after, time, IP	— (append only)

17. Success metrics

Year 1 targets come from the Project Plan v1.1; the product measures below show whether the features are working day to day.

Metric	Target	Source
Registered members	2,000+	Plan
Verified professionals	1,000+	Plan
Registered businesses	300+	Plan
Investors (internal only)	50+	Plan
Jobs published	200+	Plan
Partnerships formed	100+	Plan
Platform adoption rate	70%+	Plan
Median time from registration to approval	Under 3 working days	Proposed
Reported opportunities reviewed	Within 24 hours	Proposed
Upheld scam reports per 100 opportunities	Under 1	Proposed
Ideas with at least one approved access request	To be agreed	—
Monthly active members	To be agreed	—

18. Open questions and decisions needed

These three are deferred and will be settled during or after development; each "Proposed" item elsewhere in this PRD is a default the team can change.

- [ ] **Agreements and e-signing (UC-24–27):** keep in Phase 1, or drop, since "legal and investment contract management" is out of scope? *Decide during development.*
- [ ] **Cloud provider and region:** which provider and data region, confirmed against the Personal Data Protection Act. *Decide during development, before the pilot goes live.*
- [ ] **Admin team size:** how many reviewers handle the verification and moderation queues? *Decide during or after development, based on pilot volumes.*

Decided on 14 October 2026

- NIDA: manual admin review in Phase 1; integrate with NIDA's verification service later if problems arise.
- Training: any verified member can post; every post needs admin approval.
- Contact sharing: optional; each member chooses whether connections can see their phone or email.
- OTP: by email during the pilot; SMS considered later, depending on cost.
- Investor invitations: Administrators and Super Administrators.
- Probation: a new poster's first 3 posts are reviewed; 2 upheld reports in 12 months suspend posting, 3 suspend the account.
- Investor ticket bands: under TZS 10M, TZS 10–50M, over TZS 50M.
- Hosting: cloud hosting.
